TIME ATTENDANCE SYSTEM

We are able to support your business in the design and application of a proficient and accurate Time Tracking Management System. From a time card to an advanced biometric system, depending on your business needs our team can advise you on the best solution that fits your organization's requirements.

Our Time-Attendance system is an automatic attendance marking system which records attendance data of a user and generates various reports for further action. It not only saves administrative cost but also facilitates HR to centrally manage attendance policies from multiple locations. HR can easily utilize the software for employee review, appraisals or monthly salary calculation. Automatic calculation of overtime, leave balance, enables managers to work efficiently.

Its standalone or network based operation is ideal for schools, hospitals, government institutes, banks, remote sites, hotels, small/large enterprises and many more.

ACCESS CONTROL SYSTEM

In physical security, access control refers to the practice of restricting entry of unauthorized person in a secured area. Our access control enables organizations to have controllable but secured security for their employees and infrastructure. It decides user entry based on who is allowed, when he is allowed and where he is allowed.

Access based on palm veins, fingerprint, RFID card, PIN and combinations of all these credentials plus many advanced features ensure full-proof security for the organization. Its standalone or network based operation makes an ideal access control option for schools, hospitals, government institutes, banks, remote sites, hotels, small/large enterprises and many more.

We offers a complete range of access control hardware and software that integrates advanced security technologies with networking capabilities to bring you a complete security solution to serve any size facility.

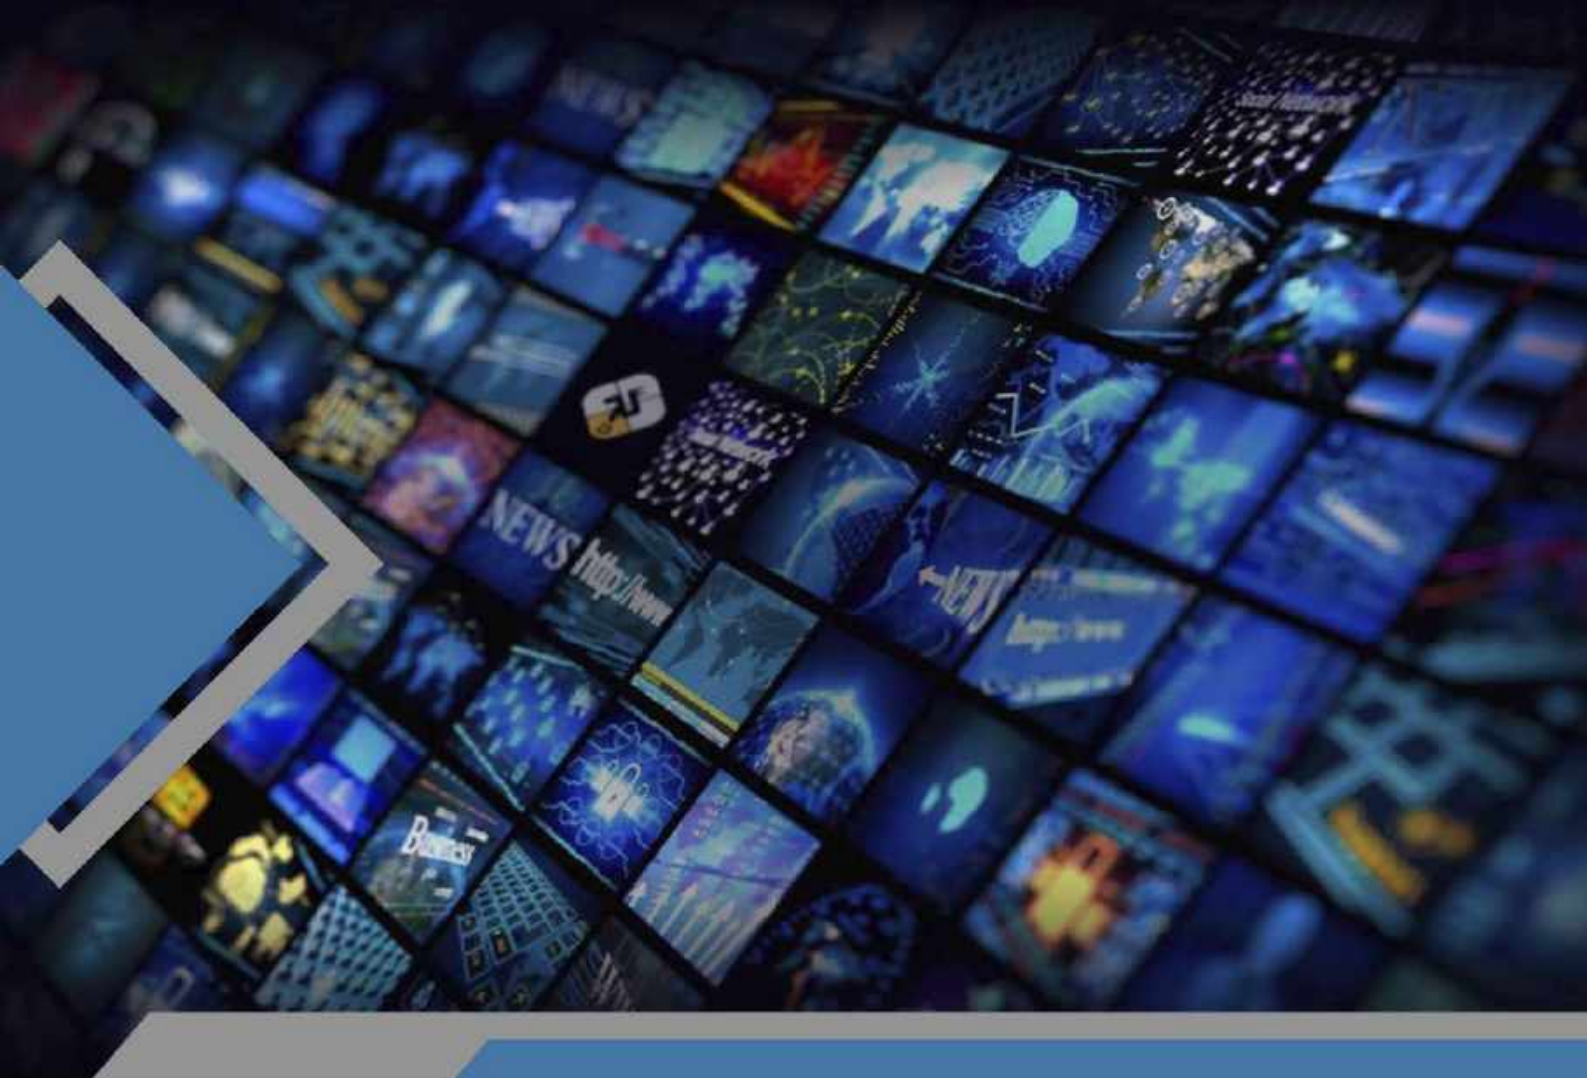

AUDIO & VIDEO INTERCOM SYSTEM

The audio & video entry security phones are very convenient for verification and identification of persons requesting entry and can range from a single door audio unit to multiple doors video systems. We provides many type of intercom for residential and commercial purpose.

These modern systems help in providing great safety and reliability on the doorbell systems. You can view the person standing out of your door easily by using the excellent audio and video Intercom System. The residential areas require complete security nowadays because we cannot trust an unknown person.

Therefore, you must use this intercom system to stop the invitation of an unknown guest in your house by watching them clearly through the Video Intercom System.

IPTV & SMATV SYSTEM

Reception and distribution of broadcast television programs is a must system for each and every building be it a commercial or a residential building, a shopping mall or any other property.
